WHY ME

"In 2019, I sustained a traumatic brain injury. One moment I was a fully functioning professional. The next, I couldn't remember what I'd said five minutes ago."

I searched for a tool that could bridge the gap between what I intended and what I could actually do. Something that would remember what I couldn't.

It didn't exist. So I built it.

MyRhythm isn't a pitch I rehearsed. It's a solution I needed to stay alive, stay relevant, and stay connected to the people I love.

THE CCM SOLUTION

Three pillars. One continuous system.

COLLABORATIVE

Digitises caregiver scaffolding via Support Circles and Sync-Point dashboards. Reduces relational friction.

COGNITIVE

Rhythmic Intelligence predicts cognitive crashes. The Cognitive Metronome provides regulation based on environmental data.

MANAGEMENT

Energy-aware scheduling and Memory Bridge sustain performance. Clinical gains become functional life-skills.

Bridging the Implementation Gap and the Ecological Gap — from clinic to life.

MARKET OPPORTUNITY

$40B+ Total Addressable Market

Acquired Brain Injury	**69M cases/yr globally**	Zero continuous digital solutions post-discharge
ADHD & Executive Function	**366M adults worldwide**	Shared cognitive challenges: scheduling, memory
Long COVID Cognitive	**65M+ cases globally**	Brain fog, fatigue management, underserved
Dementia & MCI	**55M now → 139M by 2050**	7th leading cause of death globally

Private & Confidential | Created by Annabel Aaron, Founder & CEO | © 2026 Annabel Aaron. All rights reserved.

THE LEAP PLATFORM

Six integrated capabilities. One rhythm.

Rhythmic Intelligence

Predicts energy patterns and cognitive capacity

Memory Bridge

Captures conversations, extracts actions, bridges memory gaps

Support Circles

Trusted people receive structured visibility

Cognitive Metronome

Real-time pacing guidance prevents cognitive overload

Energy-Aware Calendar

Tasks matched to energy. Peak capacity windows.

The Sync-Point

Caregiver dashboard for shared visibility

TRACTION & MILESTONES

Q1 2026

MVP built & live
CCM methodology defined
Seed round preparation

Q2 2026

Beta launch — 500 users
NHS pilot discussions
Support Circle v1 live

Q3 2026

1,500 active users
First B2B contracts
Memory Bridge AI launch

Q4 2026

£500K ARR target
3 clinical partnerships
Series A preparation

2027–2031: International expansion → Platform partnerships → Global CCM standard → 100K+ users

COMPETITIVE LANDSCAPE

	MyRhythm	Lumosity	Headspace	Generic Planners
Cognitive-specific	✓	Partial	✗	✗
Caregiver integration	✓	✗	✗	✗
Energy-aware scheduling	✓	✗	✗	✗
Memory Bridge	✓	✗	✗	✗
Continuous (not episodic)	✓	✗	Partial	Partial

FIVE MOATS

- Proprietary CCM methodology — not replicable with features alone
- Ecological data continuity — real-world cognitive transfer tracking
- Rhythmic Intelligence engine — personalised cognitive prediction
- Support Circle network effects — each user brings 2–4 caregivers
- Clinical partnerships create switching costs and data lock-in
