MyRhythm — Founder Testing Plan (printable checklist)

Do the tests in order. If a test fails, stop, tell me exactly what happened (with a screenshot), and redo it once I've fixed it.

Timeline (about 2 weeks)

Day	What	Time
Day 1	Test 0 (approvals) + Test 1 (signed-in walkthrough)	30 min
Day 2	Test 2 (iPhone long recording)	2.5 hrs, mostly hands-off
Day 3	Test 3 (Android long recording)	2.5 hrs, mostly hands-off
Day 4	Test 4 (two-account Support Circle)	20 min
Days 5–6	Test 5 (wording read-through)	45 min
Days 7–10	Test 6 (10-conversation accuracy check)	10 × 5 min
Day 11	Test 7 (calendar handoff) + Test 8 (fresh-eyes friend)	40 min
Day 11	Test 9 (watch) + Test 10 (friction-free)	20 min
Day 12	Gate decision, then invite the first 5 testers	15 min

The exact tests

Test 0 — Approvals (with me)

1. In chat, type "send the card".
2. Approve both database changes when the cards appear.

Pass: I confirm both changes are applied.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 1 — Signed-in walkthrough (your phone)

1. Sign out completely. Go to myrhythmapp.com.
2. Tap Log In and sign in.
3. Check: the daily welcome appears with your name and today's #IChoose. Tap Start my day.
4. Go to the questions. Answer all 11.
5. Check: the snapshot opens with your MYRHYTHM score at the top, then the summary.
6. Tap "See the detail behind my summary". Check it opens. Tap again to close it.
7. Tap Keep these on your top 3.
8. In "What can't I afford to forget this week?", save one real thing (for example "Call the GP Thursday").
9. Go to Home. Check: "My focus" shows your #1 area, and your saved item appears.
10. Close the app, reopen it, and check the item is still there.

Pass: every check is true, nothing freezes, and no screen confuses you.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 2 — iPhone long recording

1. On an iPhone, sign in and open Memory Bridge.
2. Tap record. Play a podcast or TV programme near the phone for at least 2 hours. The screen may lock.
3. Tap Stop and save, then Save and find my next steps.
4. Check: the length is right (within 1 minute), a write-up exists, and next steps are listed.
5. Fully close the app, reopen it, and check the recording and steps are still there.

Pass: all four checks are true. Note the phone model and iOS version.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 3 — Android long recording

Same as Test 2, on an Android phone in Chrome.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 4 — Two-account Support Circle

1. Create a second account with a different email (or use the tester account).
2. From your account, invite the second account to watch one capture only.
3. Sign in as the second account. Check: they see that one capture's summary and can send encouragement.
4. Check: they cannot see any other capture, transcript, audio or calendar item.
5. Back in your account, remove the permission.
6. As the second account, refresh. Check: the shared capture has gone.

Pass: the supporter never sees anything you didn't share. Any leak is a hard fail, so stop and tell me.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 5 — Wording read-through

1. Open the review list (MyRhythm-Wording-Review.pdf) with 30 #IChoose statements and every 3-week plan line from the snapshot.
2. Mark each one Keep, Change (with your wording) or Remove.

Pass: every line is marked, and I apply your changes.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 6 — Accuracy check (10 conversations)

1. Run 10 real or realistic conversations through Memory Bridge: appointments, phone calls, family plans.
2. Score each extracted step: Accurate, Editable (right idea, small fix) or Wrong (invented, missed or wrong person).
3. Fill in the table: Total 10 | Accurate __ | Editable __ | Wrong __.

Pass: at least 8 of 10 are Accurate or Editable, and no invented step is shown as fact.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 7 — Calendar handoff

1. From a next step, tap Add to my calendar → Google. Check it appears in Google Calendar.
2. Repeat with Outlook.
3. On an iPhone, download the file. Check it opens in Apple Calendar.

Pass: all three land with the right date and time.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 8 — Fresh eyes

1. Give one trusted friend who has never seen the app the tester briefing, and nothing else.
2. Watch silently while they do it. Don't help.
3. Write down every pause, every question they ask, and every "oh".

Pass: they reach their snapshot and save one thing without your help.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 9 — Watch to my day

1. Record a 2-minute conversation on the watch (Voice Memos or Recorder). Stop.
2. Get it to the phone and upload it in Memory Bridge (see Help → Use MyRhythm from my watch).
3. Check: it is named automatically ("From my watch or phone · day, time"), written up, and next steps are offered.
4. Put them in your day.

Pass: done within 5 minutes, no typing, and nothing placed without your yes.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Test 10 — Friction-free check

1. Start a recording from the phone's home-screen Record shortcut, or three taps on the back of an iPhone (Settings → Tap to record).
2. Record, tap Stop and save, then put the steps in your day.
3. Count every tap and every question.

Pass: no screen asks something you don't understand, and nothing feels like an extra step.

☐ PASS ☐ FAIL Date: _____ Notes: _____

Gate decision (Day 12)

- All tests pass → send the briefing and form to the first 5 testers. Add 5 more a week later if nothing serious comes up.
- Any test fails → the founders group waits. I fix the problem and you redo that test only.
- Payments stay in test mode throughout.

While testers are using it (weeks 1–3)

- Day 2: send each tester a short "How's it going?" message.
- Day 7: send the feedback form.
- Each Friday: paste the feedback into chat. I'll sort it into must-fix, nice-to-have and ignore.
