THE CCM SOLUTION

Three pillars. One continuous system.

COLLABORATIVE

Digitises caregiver scaffolding via Support Circles and Sync-Point dashboards. Reduces relational friction.

COGNITIVE

Rhythmic Intelligence predicts cognitive crashes. The Cognitive Metronome provides regulation based on environmental data.

MANAGEMENT

Energy-aware scheduling and Memory Bridge sustain performance. Clinical gains become functional life-skills.

Bridging the Implementation Gap and the Ecological Gap — from clinic to life.

MARKET OPPORTUNITY

$40B+

Total Addressable Market

Acquired Brain Injury
69M cases/yr globally

TBI, stroke, aneurysm — the core market. Zero continuous digital solutions post-discharge.

ADHD & Executive Function
366M adults worldwide

Shared cognitive challenges: scheduling, memory, task completion. CCM applies directly.

Long COVID Cognitive
65M+ cases globally

Brain fog, fatigue management, cognitive pacing — emerging and underserved.

Multiple Sclerosis
2.8M worldwide

Progressive cognitive decline needs continuous management, not episodic clinical visits.

THE LEAP PLATFORM

Six integrated capabilities. One rhythm.

Rhythmic Intelligence

Predicts energy patterns and cognitive capacity. Schedules around your natural rhythm.

Memory Bridge

Captures conversations, extracts actions, bridges memory gaps between meetings.

Support Circles

Trusted people receive structured visibility. Accountability without surveillance.

Cognitive Metronome

Real-time pacing guidance. Prevents cognitive overload before it happens.

Energy-Aware Calendar

Tasks matched to energy. High-demand work meets peak capacity windows.

The Sync-Point

Caregiver dashboard for shared visibility. Reduces conflict. Builds trust.

REVENUE MODEL

Three streams. Recurring. Scalable.

60%

B2C Subscriptions

£9.99/mo Individual | £14.99/mo Family

Direct-to-consumer via app stores. Freemium conversion funnel with 7-day trial.

30%

B2B / Clinical Licensing

£499–£2,999/mo per organisation

Rehab centres, NHS trusts, insurance partners. Per-seat or site licensing.

Target: **£500K ARR by Dec 2026**

TRACTION & MILESTONES

Q1 2026

- MVP built & live
- CCM methodology defined
- Seed round preparation

Q2 2026

- Beta launch — 500 users
- NHS pilot discussions
- Support Circle v1 live

Q3 2026

- 1,500 active users
- First B2B contracts
- Memory Bridge AI launch

Q4 2026

- £500K ARR target
- 3 clinical partnerships
- Series A preparation

2027–2031: International expansion → Platform partnerships → Global CCM standard → 100K+ users

COMPETITIVE LANDSCAPE

	MyRhythm	Lumosity	Headspace	Generic Planners
Cognitive-specific	Yes	Partial	No	No
Caregiver integration	Yes	No	No	No
Energy-aware scheduling	Yes	No	No	No
Memory Bridge	Yes	No	No	No
Continuous (not episodic)	Yes	No	Partial	Partial

FIVE MOATS

- Proprietary CCM methodology — not replicable with features alone
- Ecological data continuity — real-world cognitive transfer tracking
- Rhythmic Intelligence engine — personalised cognitive prediction
- Support Circle network effects — each user brings 2–4 caregivers
- Clinical partnerships create switching costs and data lock-in

THE ASK

£350K
